

# WZ-H3T-N Selective & High Temperature Resistant Formaldehyde Module

**ProSense Technologies Co., Ltd.**

## Brief Introduction

WZ-H3T-N selective & high temperature resistant formaldehyde module is the one launched specially for application in cases where temperature is higher than 60 °C . WZ-H3T-N HCHO module is the first application of solid electrolyte integrated in fuel cell vehicles to HCHO detection ----real solid electrolyte, free from electrolyte leakage or dry out; WZ-H3T-N selective HCHO module is free from the influence of the interference gases at low concentration, such as C<sub>2</sub>H<sub>5</sub>OH and can generate accurate detection result. WZ-H3T-N selective HCHO module is pre-calibrated in the factory and can be integrated into your system directly.

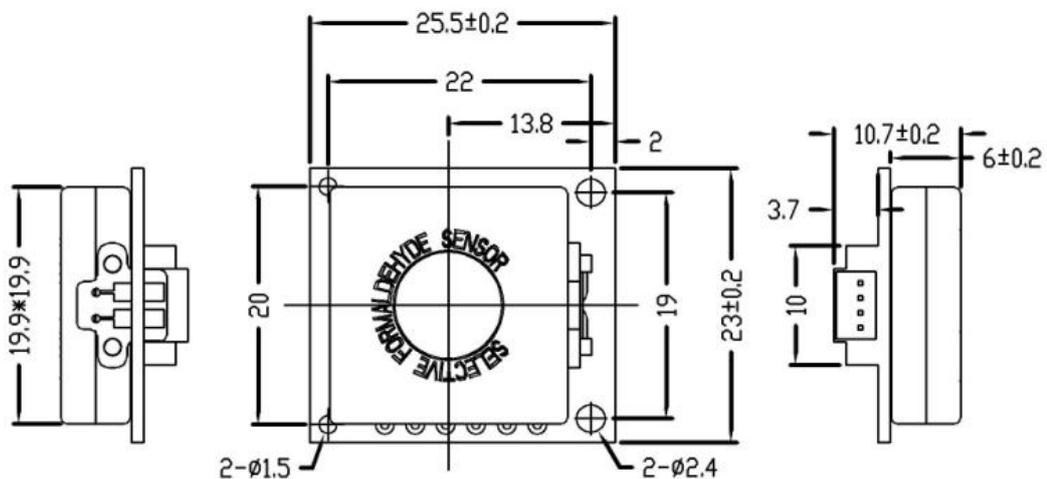

## Typical Applications

HCHO detection in vehicle  
 Air conditioners  
 Smart home  
 Portable devices  
 Wearable devices  
 Air purifier  
 ... ..

## Key Features

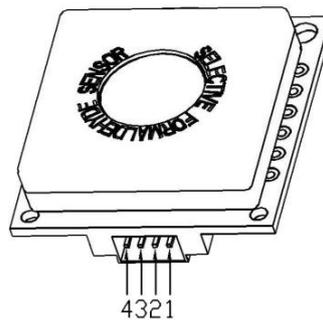

Selective detection  
 High temperature resistance  
 High precision  
 Fast response  
 Long service life  
 Low power consumption  
 High stability

## Diagram

## Definition of Pins

| PIN  | DEFINITION               |
|------|--------------------------|
| Pin1 | Vin(5V)                  |
| Pin2 | GND                      |
| Pin3 | RXD (0~3.3V data input)  |
| Pin4 | TXD( 0~3.3V data output) |

## Technical Specification

| MODEL                       | WZ-H3T-N                                                        |             |          |
|-----------------------------|-----------------------------------------------------------------|-------------|----------|
| Detection Principle         | Micro fuel cell                                                 |             |          |
| Detectable Gas              | HCHO                                                            | temperature | humidity |
| Detection Range             | 0-1ppm                                                          | -40~125℃    | 0-100%   |
| Overload                    | 5ppm                                                            | /           | /        |
| Input Voltage               | 4.5-7V                                                          |             |          |
| Response Time (T90)         | <90S                                                            |             |          |
| Resolution                  | 0.01ppm                                                         | 0.015℃      | 0.01%    |
| Accuracy                    | ±30ppb or ±10%,<br>whichever is<br>greater (25±3℃)<br>(50±5%RH) | ±0.3℃       | ±3%      |
| Operating temperature range | -40℃~70℃                                                        |             |          |
| Operating Humidity Range    | 10%—90%RH (non-condense)                                        |             |          |
| Lifetime                    | 6 years in air                                                  |             |          |
| Warranty Period             | 12 months                                                       |             |          |
| Weight                      | 4g                                                              |             |          |

## Cross Sensitivity

| Interference Gas                 | Concentration of Interference Gas(ppm) | Concentration of HCHO(ppm) |
|----------------------------------|----------------------------------------|----------------------------|
| C <sub>2</sub> H <sub>5</sub> OH | 2                                      | <0.04                      |
| C <sub>6</sub> H <sub>6</sub>    | 10                                     | 0                          |
| CH <sub>3</sub> COOH             | 10                                     | 0                          |
| NH <sub>3</sub>                  | 10                                     | 0                          |
| CO                               | 1000                                   | 6                          |
| H <sub>2</sub>                   | 1000                                   | 6                          |

## Communication Protocol

### ➤ General Settings

Module makes use of serial communication.

Communication configuration parameters are:

|            |        |
|------------|--------|
| Baud rate  | 9600   |
| Data bits  | 8 bits |
| Stop bit   | 1 bit  |
| Parity bit | None   |

### ➤ Communication Command

There are two communication types: active upload type and Q&A type. The default type is active upload and it sends gas concentration once every second. Commands are as follow:

| 0     | 1    | 2    | 3    | 4           | 5           | 6            | 7            | 8             | 9       | 10      | 11       | 12       | 13       |
|-------|------|------|------|-------------|-------------|--------------|--------------|---------------|---------|---------|----------|----------|----------|
| start | R    | R    | R    | data        |             |              |              |               |         |         |          |          | checksum |
| 0xFF  | 0x17 | 0x04 | 0x00 | HCHO<br>ppb | HCHO<br>ppb | Range<br>ppb | Range<br>ppb | t<br>+/-0/-:1 | t<br>°C | t<br>°C | RH%<br>% | RH%<br>% | XX       |

R means reserved

HCHO concentration = HCHO (high byte) \* 256 + HCHO (low byte)

1ppm=1000ppb

Temperature = t (high byte) + t (low byte / 100)

Humidity = RH% (high byte) + RH% (low byte / 100)

#### Switch to Q&A mode:

| 0     | 1        | 2              | 3    | 4        | 5        | 6        | 7        | 8        |
|-------|----------|----------------|------|----------|----------|----------|----------|----------|
| Start | Reserved | Switch command | Q&A  | Reserved | Reserved | Reserved | Reserved | Checksum |
| 0xFF  | 0x01     | 0x78           | 0x41 | 0x00     | 0x00     | 0x00     | 0x00     | 0x46     |

#### Switch to active upload mode:

| 0     | 1        | 2              | 3             | 4        | 5        | 6        | 7        | 8        |
|-------|----------|----------------|---------------|----------|----------|----------|----------|----------|
| Start | Reserved | Switch command | Active upload | Reserved | Reserved | Reserved | Reserved | Checksum |
| 0xFF  | 0x01     | 0x78           | 0x40          | 0x00     | 0x00     | 0x00     | 0x00     | 0x47     |

#### To read gas concentration:

| 0     | 1        | 2       | 3        | 4        | 5        | 6        | 7        | 8        |
|-------|----------|---------|----------|----------|----------|----------|----------|----------|
| Start | Reserved | Command | Reserved | Reserved | Reserved | Reserved | Reserved | Checksum |
| 0xFF  | 0x01     | 0x86    | 0x00     | 0x00     | 0x00     | 0x00     | 0x00     | 0x79     |

#### To return:

| 0     | 1       | 2                                    | 3                                   | 4        | 5        | 6                                  | 7                                 | 8        |
|-------|---------|--------------------------------------|-------------------------------------|----------|----------|------------------------------------|-----------------------------------|----------|
| Start | Command | Concentration (High byte)<br>(ug/m3) | Concentration (low byte)<br>(ug/m3) | Reserved | Reserved | Concentration (High byte)<br>(ppb) | Concentration (low byte)<br>(ppb) | Checksum |
| 0xFF  | 0x86    | B3                                   | B2                                  | 0x00     | 0x00     | B1                                 | B0                                | 0x30     |

Gas concentration = concentration (high byte) \* 256 + concentration (low byte)

#### To read temperature and humidity:

| 0     | 1        | 2       | 3        | 4        | 5        | 6        | 7        | 8        |
|-------|----------|---------|----------|----------|----------|----------|----------|----------|
| Start | Reserved | Command | Reserved | Reserved | Reserved | Reserved | Reserved | Checksum |
| 0xFF  | 0x01     | 0x3F    | 0x00     | 0x00     | 0x00     | 0x00     | 0x00     | XX       |

#### To return:

| 0     | 1       | 2    | 3    | 4    | 5    | 6    | 7        | 8        |
|-------|---------|------|------|------|------|------|----------|----------|
| Start | Command | data | data | data | data | data | Reserved | Checksum |

|      |      |         |        |        |     |     |      |    |
|------|------|---------|--------|--------|-----|-----|------|----|
| 0XFF | 0X3F | +:0/-:1 | t (°C) | t (°C) | RH% | RH% | 0x00 | XX |
|------|------|---------|--------|--------|-----|-----|------|----|

Temperature = t (high byte) + t (low byte / 100)

Humidity = RH% (high byte) + RH% (low byte / 100)

## Checksum calibration

/\*\*\*\*\*\*

\*Function name: unsigned char FucCheckSum(uchar \*i,uchar ln)

\*Function description: checksum calibration[Take Not(Byte1+Byte2+...Byte7) +1]

\*Note: Take Not(Byte1+Byte2+...ByteX (X>2)

\*\*\*\*\*/

unsigned char FucCheckSum(unsigned char \*i, unsigned char ln)

```
{
    unsigned char j, tempq=0;
    i+=1;
    for(j=0; j<(ln-2); j++)
    {
        tempq+=*i;
        i++;
    }
    tempq=(~tempq)+1;
    return(tempq);
}
```

### Notes

- Avoid changing or moving sensor on the module.
- Avoid moving or changing electronic elements on PCB.
- Avoid exposure to organic vapour, organic solvent、 high gas concentration.
- Protect from excessive vibration and shock.
